PROFILE

Tech-driven problem solver, pursuing a B.S. in Computer Science at Tec de Monterrey.I craft solutions and push limits in everything from full-stack development to managing complex projects.Freelancing keeps me sharp, as I continuously hone my front-end, back-end, and UX/UI skills. Daily grind? Communication and teamwork—because winning solo isn't an option. Let's disrupt.

EMPLOYMENT HISTORY

Aug 2024 — Present

FullStack Developer, Stardust Agency LLC

- At Stardust, I am currently dedicated to the full-cycle development of web applications, from initial planning and design to final implementation and deployment. I work with the entire technological stack used by the company, ensuring that all components of the project are well-integrated and optimized. While my primary focus is on web development, I also take on various IT responsibilities as needed, contributing to different aspects of the agency's operations and supporting the team in achieving our goals.

Dec 2023 — Present

IT Team Leader , Biointellectus   Mexico City

- Initially, I completed my social service at the company, and after six months, I was offered a position due to my high performance during my tenure.
- Currently, I specialize in project management and development, leading teams of programmers across various initiatives, including an e-commerce platform, an online learning platform featuring on-demand video similar to Udemy or Coursera, and a video game. All these projects are focused on addressing the global issue of plastic pollution.
